Introduction

This publication constitutes the final version of the 1986 Census Products and Services. It replaces the preliminary version released in March 1987. Information on products available from the 100% data base and the 20% data base is provided as well as information on how to order these products.

The 1986 Census

The 1986 Census was the first mid-decade census in Canada's history to undertake detailed enumeration. Data were collected on demographic, social and economic characteristics, and on dwellings, with the information being recorded in a 100% data base and a 20% sample data base.

The 100% data base includes general demographic and dwelling and household data (for example: age, sex, marital status, mother tongue and structural type of dwelling) from the entire population.

The 20% sample data base includes general demographic data plus detailed socio-economic data (for example: ethnic origin, labour force activity, schooling, income and dwelling characteristics) collected from one-fifth of the population. It excludes the institutional residents.

All data compiled by Statistics Canada are subject to confidentiality procedures, under the provisions of the Statistics Act that prohibit disclosure of information that could identify an individual.

How to Use This Publication

Structure

Unlike the preliminary edition, this publication is divided into two parts, the census products and the census services. Each part is then subdivided into sections according to product or service offered. A "product" is defined as a publication, a machine-readable

table and profile, a map or a computerized file which is already predetermined and can be available, without delay, as soon as a user requests it. A "service" permits the user to obtain, on request only, a product specially designed to meet the client's needs.

Content

- This publication begins with a general table of contents, and also features a specific table of contents at the beginning of each part, three appendices and an index.
- A description of each product and service is provided and the table titles found on machine-readable tables and data publications are listed.
- A list of publications showing the catalogue numbers, the prices and the release dates, as well as a list of geographical maps series and a sample of each one, are included.
- The names of depository libraries, regional reference centres and different Statistics Canada services are listed. An order form and a comments card are also provided.

Release of Data Products	Date
<u>PUBLICATIONS</u>	
Interim Population Counts	January 1987
Final Population Counts	April 1987
Data collected from all households (100%)	From July 1987 to February 1988 (See "List of Publications", page 39.)
Data collected from a sample of households (20%)	From May 1988 to May 1989 (See "List of Publications", page 39.)
<u>MACHINE-READABLE TABLES AND PROFILES</u>	
Basic Summary Tables

How to Order

To obtain publications, use the order form at the end of the present document or contact any of the Regional Reference Centres. Publication numbers and prices are listed starting on page 39.

To purchase any other census products, contact the nearest Regional Reference Centre or the User Services listed in the section "For More Information" on page 127.

Where to Find Census Publications

While customers who make extensive use of census information may wish to purchase their own copies of census publications, complete sets are available at Library Services of Statistics Canada, at all Statistics Canada Regional Reference Centres and at any of the 52 libraries across Canada and in other countries that automatically receive all federal government publications free of charge. A list of these libraries is provided in the section "For More Information" on page 130. In addition, 300 local libraries receive, free of charge, selected census publications of local interest.

LIST OF GEOGRAPHIC ABBREVIATIONS

The following is a list of geographic abbreviations frequently used in this catalogue and in all of the products and services relating to the 1986 Census.

Abbreviations	Standard Census Geographic Areas
CA	Census agglomeration
CCS	Census consolidated subdivision
CD	Census division
CMA	Census metropolitan area
CMA/CA Parts	Census metropolitan area and census agglomeration parts
CSD	Census subdivision
CT	Census tract
EA	Enumeration area
FED	Federal electoral district
PCA	Primary census agglomeration
PCMA	Primary census metropolitan area
PCT	Provincial census tract
PR	Province/territory
UA	Urban Area
UP	Unincorporated place

PART I: PRODUCTS

The first part of this catalogue covers all Statistics Canada products relating to the 1986 Census. The census products are those judged to be in greatest demand and therefore are planned and produced as publications, maps or files in machine-readable form.

PUBLICATIONS

This section presents all 1986 Census-related publications that have already been published or will be in the next two years. The publications are divided into four main groups which are, in turn, divided into series.

For every series, a description of each publication is given on the following pages and the necessary ordering information, i.e. catalogue number, title of the publication, price and planned release date is listed starting on page 39.

Main Groups	Series
Population and Dwelling counts	<ul style="list-style-type: none">- Population- Place Name Reference Lists
Population and Dwelling characteristics	<ul style="list-style-type: none">- The Nation- Dimensions- Profiles
Analytical	<ul style="list-style-type: none">- Metropolitan Atlas- Focus on Canada
General and Geographic reference	<ul style="list-style-type: none">- Reference (General)- Reference: Geographic

DESCRIPTION OF PUBLICATIONS

This section first describes what is included in each group and then provides an overview of the series contained therein. It also presents the content of each publication and, where possible, lists the tables for each.

POPULATION AND DWELLING COUNTS

The Population and Dwelling Counts publications provide basic 1986 counts for all standard geographic areas. Measures of change since 1981 are frequently given as well.

A total of 20 publications are available in two series:

- Population
- Place Name Reference Lists

POPULATION SERIES

These 17 publications provide final, unrounded population and dwelling counts. Five of these publications (one per each type of selected standard geographic area) provide the counts for Canada, e.g., one publication contains data on all FEDs in Canada. The remaining 12, one publication per province or territory, present counts according to various standard geographic levels within the province or territory.

92-101 Census Divisions and Subdivisions

This publication presents 1986 population counts along with the national rank and provincial rank of each CD and CSD. For example, a CSD in Newfoundland is ranked by population size with other Newfoundland CSDs, and all CSDs in Canada. Tables list the data either alphabetically by CD and CSD or by decreasing population size.

Table Titles

1. Census divisions by province, showing population and rank, for Canada, 1986
2. Census subdivisions in alphabetical order, showing population and population rank, for Canada, 1986
3. Census subdivisions in decreasing population order, for Canada, 1986

92-102 Federal Electoral Districts

Included in this publication are 1981 and 1986 population counts for Canada's 282 FEDs, along with percentage population changes and dwelling counts. A map showing FEDs is also included.

Table Titles

1. Federal electoral districts - Population and occupied private dwellings, for Canada, 1981 and 1986
2. Federal electoral districts and census subdivisions - Population, 1986

92-103 Federal Electoral Districts and Census Enumeration Areas

EA population counts and occupied private dwelling counts for 1986 are grouped by FEDs in this publication.

Table Title

Federal electoral districts and census enumeration areas - Population and occupied private dwellings, 1986

92-104 Census Metropolitan Areas and Census Agglomerations

Data for CMAs and CAs include 1986 and 1981 population counts, percentage population changes, provincial rank and national rank. Also included are counts for component CSDs of CMAs, CAs, PCMs and PCs.

Table Titles

1. Census metropolitan areas and census agglomerations - Population and population rank, for Canada, 1986
2. Census metropolitan areas and census agglomerations with primary census metropolitan areas, primary census agglomerations and component census subdivisions - Population and population rank, for Canada, 1986
3. Census metropolitan areas and census agglomerations in decreasing population order, for Canada, 1986

92-105 Unincorporated Places

Counts for UPs have traditionally been and still are included in the Place Name Reference Lists, but users have expressed a desire to have these counts sooner. Accordingly, a publication is being produced to enable earlier access. This publication also shows the location of UPs within province, CD and CSD.

Table Title

Unincorporated places in alphabetical order, showing population and location, for Canada, 1986

**92-109 Population and Dwelling Counts - Provinces and Territories
to**

92-120 These publications include, in addition to basic 1986 counts, information on population change (1981 counts and percentage changes), "provincial rank", "national rank", land area, population density and geographic location.

Table Titles

1. Census subdivisions - Population, population rank and geographic location, 1986
2. Census divisions and census subdivisions - Population and occupied private dwellings, 1981 and 1986
3. Census subdivisions in decreasing population order, 1986
4. Census divisions and census subdivisions - Urban and rural population, 1986
5. Census divisions, census consolidated subdivisions and census subdivisions - Population, 1986
6. Census divisions - Population and occupied private dwellings, 1981 and 1986
7. Census divisions in decreasing population order, 1986
8. Census divisions - Population for urban size groups and rural, 1986
9. Census metropolitan areas, census agglomerations, primary census metropolitan areas and primary census agglomerations - Population and population rank, 1986
10. Census metropolitan areas and census agglomerations with primary census metropolitan areas, primary census agglomerations and component census subdivisions - Population and occupied private dwellings, 1981 and 1986

**92-109 Population and Dwelling Counts - Provinces and Territories - Concluded
to
92-120**

11. Census metropolitan areas and census agglomerations, urbanized core and fringe with primary census metropolitan areas, primary census agglomerations and urban areas - Population, 1986
 12. Urban areas - Population and occupied private dwellings, 1981 and 1986
 13. Urban areas in decreasing population order, 1986
 14. Urban areas with census subdivisions - Population, 1986
-

PLACE NAME REFERENCE LISTS SERIES

These publications list place names in provinces and territories and show their census level (CD, CSD, UP, etc.) along with counts. Counts for UPs are included.

- 92-121 Atlantic Provinces**
92-122 Quebec and Ontario
92-123 Western Provinces and the Territories

In addition to providing 1986 population counts, Place Name Reference Lists identify the Standard Geographical Classification (SGC) codes, longitude, latitude and the census map for each place. One table is an alphabetical listing for each province and territory whereas a second table is organized in SGC code order.

Table Titles

1. Census subdivisions and unincorporated places - Population and geographic location, 1986
2. Census subdivisions and unincorporated places by census division and census consolidated subdivision - Population, 1986

POPULATION AND DWELLING CHARACTERISTICS

The Population and Dwelling Characteristics publications present a wide range of census data by variable, selected topics and standard geographic areas.

These publications are available in three series:

- The Nation
- Dimensions (previously called "Special Interest")
- Profiles

THE NATION SERIES

These 19 publications indicate the scope and depth of census information. Considerable detail for selected variables is given and cross-tabulation of variables illustrate the analytical potential of the data.

The series provides national coverage. Most tables include provincial and territorial data, but no subprovincial data. Some tables include comparisons to 1981 data, and a few show data from earlier censuses. Four of the publications contain only data collected from all households (100% data); the remainder provide data collected from a 20% sample.

93-101 Age, Sex and Marital Status (100% data)

This publication presents the age, sex and marital status composition of Canada's population, 1986, and as such provides fundamental demographic data. The publication consists of five tables which show various cross-classifications for Canada, the provinces and territories.

Table Titles

1. Population by selected age groups and sex, for Canada, provinces and territories, 1921-1986
2. Population by marital status and sex, for Canada, provinces and territories, 1921-1986
3. Population by five-year age groups and sex, for Canada, provinces and territories, 1981 and 1986
4. Population by single years of age and sex, for Canada, provinces and territories, 1986
5. Population by selected age groups and sex, showing marital status, for Canada, provinces and territories, 1986

93-102 Language: Part 1 (100% data)

Mother tongue distributions are cross-classified by age groups and sex. Historical data (1981-1986) are also presented.

Table Titles

1. Population by mother tongue and sex, for Canada, provinces and territories, 1986
2. Mother tongue: number of respondents by type of answer and sex, for Canada, provinces and territories, 1986
3. Population by selected mother tongues and sex, showing age groups, for Canada, provinces and territories, 1986
4. Population by selected mother tongues and sex, for Canada, provinces and territories, 1981 and 1986

93-103 Language: Part 2 (20% sample data)

Home language and official language distributions are cross-classified by age group, sex, mother tongue and mobility status. Historical data (1981-1986) are also presented.

Table Titles

1. Population by home language and sex, for Canada, provinces and territories, 1986
2. Home language: number of respondents by type of answer and sex, for Canada, provinces and territories, 1986
3. Population by selected home languages and sex, showing age groups, for Canada, provinces and territories, 1986
4. Population by selected home languages and sex, for Canada, provinces and territories, 1981 and 1986
5. Population 5 years and over by place of residence in 1986, mother tongue and sex, showing place of residence in 1981, for provinces and territories, 1986
6. Population 5 years and over by place of residence in 1986, home language and sex, showing place of residence in 1981, for provinces and territories, 1986

93-103 Language: Part 2 (20% sample data) -Concluded

7. Population by official language and sex, for Canada, provinces and territories, 1986
 8. Population by official language and sex, showing age groups, for Canada, provinces and territories, 1986
 9. Population by selected mother tongues and sex, showing official language, for Canada, provinces and territories, 1986
 10. Population by selected home languages and sex, showing official language, for Canada, provinces and territories, 1986
-

93-104 Dwellings and Households: Part 1 (100% data)

Final statistics for private households and dwellings for Canada, the provinces and territories are listed.

Table Titles

1. Population, occupied private dwellings, private households, census families and average number of persons per private household and per census family, for Canada, provinces and territories, 1961-1986
2. Population in collective dwellings by type, institutional resident/staff status, showing age and sex, for Canada, provinces and territories, 1986
3. Total private dwellings, occupied private dwellings and unoccupied private dwellings, for Canada, provinces and territories, 1986
4. Total occupied dwellings, for Canada, provinces and territories, 1986
5. Occupied private dwellings by structural type and tenure, showing number of persons per household, for Canada, provinces and territories, 1986
6. Occupied private dwellings by structural type and tenure, showing type of household, for Canada, provinces and territories, 1986
7. Private households by type, showing number of persons per household, for Canada, 1961-1986
8. Private households by number of persons, for Canada, provinces and territories, 1981 and 1986
9. Private households by type, for Canada, provinces and territories, 1981 and 1986
10. Private households by type, showing number of persons per household, for Canada, provinces and territories, 1986

93-104 Dwellings and Households: Part 1 (100% data) - Concluded

11. Private households by tenure, showing age and sex of household maintainer, for Canada, provinces and territories, 1986

93-105 Dwellings and Households: Part 2 (20% sample data)

Final statistics for selected characteristics of private households and dwellings for Canada, the provinces and territories are presented.

Table Titles

1. Occupied private dwellings by tenure and structural type, showing period of construction, for Canada, provinces and territories, 1986
2. Occupied private dwellings by tenure and number of persons per household, showing number of rooms, for Canada, provinces and territories, 1986
3. Occupied private dwellings by tenure, showing main type of heating equipment and principal heating fuel, for Canada, provinces and territories, 1986
4. Owner-occupied private non-farm, non-reserve dwellings by structural type, showing value of dwelling, for Canada, provinces and territories, 1986
5. Occupied private dwellings by type and size of household, showing number of persons per room, central heating equipment and period of construction, for Canada, provinces and territories, 1986
6. Occupied private dwellings by selected structural type and main type of heating equipment, showing period of construction, for Canada, 1986
7. Private households by type, showing selected dwelling and household characteristics, for Canada, provinces and territories, 1986
8. Private households by age and sex of household maintainer, showing selected dwelling and household characteristics, for Canada, provinces and territories, 1986
9. Private households by number of persons, showing selected dwelling and household characteristics, for Canada, provinces and territories, 1986
10. Private households by tenure, showing number of persons per room and average persons per room, for Canada, provinces and territories, 1986
11. Private households in owner-occupied non-farm, non-reserve dwellings by type of household, showing owner's major payments as a percentage of 1985 household income, for Canada, provinces and territories, 1986

93-105 Dwellings and Households: Part 2 (20% sample data) - Concluded

12. Private households in tenant-occupied non-farm, non-reserve dwellings by type of household, showing gross rent as a percentage of 1985 household income, for Canada, provinces and territories, 1986
13. Private households in owner-occupied non-farm, non-reserve dwellings by type of household and owner's major payments, showing 1985 household income, for Canada, provinces and territories, 1986
14. Private households in tenant-occupied non-farm, non-reserve dwellings by type of household and gross rent, showing 1985 household income, for Canada, provinces and territories, 1986
15. Private households by selected dwelling and household characteristics, showing 1985 household income, for Canada, provinces and territories, 1986

93-106 Families: Part 1 (100% data)

Statistics on census families, family persons and non-family persons are given.

Table Titles

1. Census families in private households by number of persons, for Canada, provinces and territories, 1971-1986
2. Census families in private households by family type, showing family structure, for Canada, provinces and territories, 1981 and 1986
3. Census families in private households by number of children at home, showing family structure, for Canada, provinces and territories, 1981 and 1986
4. Census families in private households by age groups of children at home, showing family structure, for Canada, provinces and territories, 1981 and 1986
5. Husband-wife census families in private households by age group of husband, showing age group of wife, for Canada, provinces and territories, 1986
6. Population in private households by census family status and age groups, showing sex and marital status, for Canada, provinces and territories, 1986
7. Population in private households by age groups and sex, showing living arrangements, for Canada, provinces and territories, 1986
8. Non-family persons in private households by age groups and living arrangements, showing sex and marital status, for Canada, provinces and territories, 1986

93-107 Families: Part 2 (20% sample data)

Statistics on selected characteristics of census families, family persons and non-family persons.

Table Titles

1. Census families in private households by family structure, family type and labour force activity of husband and wife or lone parent, showing tenure of dwelling and number of children at home, for Canada, provinces and territories, 1986
2. Specified (*) census families in private households by selected family, household and dwelling characteristics, showing family structure and number of children at home, for Canada, provinces and territories, 1986
3. Specified (**) census families in private households by selected family, household and dwelling characteristics, showing number of additional persons in the household, family type and family structure, for Canada, 1986
4. Husband-wife census families in private households by highest level of schooling and age group of wife, showing highest level of schooling of husband, for Canada, provinces and territories, 1986
5. Husband-wife census families in private households by highest level of schooling of husband and wife, showing number and age groups of children at home, for Canada, provinces and territories, 1986
6. Husband-wife census families in private households by labour force activity and age groups of husband and wife, showing number and age groups of children at home, for Canada, provinces and territories, 1986
7. Husband-wife census families in private households by labour force activity and occupation of husband, showing labour force activity and occupation of wife, for Canada, provinces and territories, 1986
8. Husbands and wives in census families in private households by labour force activity and occupation, showing number and age groups of children at home, for Canada, provinces and territories, 1986

(*) Includes only those families in households composed of one census family with no additional persons present.

(**) Includes census families living with additional persons in the same household. These additional persons may be either members of another census family or non-family persons.

93-107 Families: Part 2 (20% sample data) - Concluded

9. Husband-wife census families in private households by number and family status of family members in labour force, showing presence of children at home, age group of wife and average family income, for Canada, provinces and territories, 1986
10. Husband-wife census families in private households by mobility status of husband, showing mobility status of wife, for Canada, provinces and territories, 1986
11. Lone-parent census families in private households by sex, age groups and highest level of schooling of parent, showing number and age groups of children at home, for Canada, 1986
12. Lone-parent census families in private households by sex, labour force activity and age group of parent, showing number and age groups of children at home, for Canada, provinces and territories, 1986
13. Lone-parent census families in private households by sex, labour force activity and occupation of parent, showing number and age groups of children at home, for Canada, 1986
14. Lone-parent census families in private households by number and family status of family members in labour force, showing sex and age groups of parent and average family income, for Canada, provinces and territories, 1986
15. Lone-parent census families in private households by sex and mobility status of parent, for Canada, provinces and territories, 1986
16. Children in census families in private households by sex, age groups and labour force activity, for Canada, provinces and territories, 1986
17. Non-family persons in private households by sex, age groups and labour force activity, showing highest level of schooling, for Canada, 1986
18. Non-family persons 15 years and over in private households by sex, labour force activity and occupation, showing age groups and average income, for Canada, 1986
19. Non-family persons in private households by sex and mobility status, for Canada, provinces and territories, 1986

93-108 Mobility Status and Interprovincial Migration

This publication presents data on the mobility status of Canadian residents. The focus is on the demographic, educational and employment characteristics of interprovincial migrants 15 years and over. The components (in, out and net) of interprovincial migration are also shown.

93-108 Mobility Status and Interprovincial Migration - Continued

Table Titles

1. Percentage distribution of the population 5 years and over by sex, showing mobility status, for Canada, provinces and territories, 1961-1986
2. Population 5 years and over by age groups and sex, showing mobility status, for Canada, provinces and territories, 1986
3. Interprovincial migrants 5 years and over by sex, showing the components of interprovincial migration, for the provinces and territories, 1961-1986
- 4A. Interprovincial migrants 5 years and over by age groups and sex, showing marital status, for Canada, 1986
- 4B. Interprovincial migrants 5 years and over by marital status, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 5A. Interprovincial migrants 15 years and over by age groups and sex, showing highest level of schooling, for Canada, 1986
- 5B. Interprovincial migrants 15 years and over by highest level of schooling, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 6A. Interprovincial migrants 15 years and over by age groups and sex, showing major field of study, for Canada, 1986
- 6B. Interprovincial migrants 15 years and over by major field of study, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 7A. Interprovincial migrants 15 years and over by age groups and sex, showing labour force activity, for Canada, 1986
- 7B. Interprovincial migrants 15 years and over by labour force activity, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 8A. Interprovincial migrants 15 years and over in the labour force by age groups and sex, showing occupation major groups, for Canada, 1986
- 8B. Interprovincial migrants 15 years and over in the labour force by occupation major groups, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 9A. Interprovincial migrants 15 years and over in the labour force by age groups and sex, showing industry divisions, for Canada, 1986

93-108 Mobility Status and Interprovincial Migration - Concluded

- 9B. Interprovincial migrants 15 years and over in the labour force by industry divisions, age groups and sex, showing the components of interprovincial migration, for the provinces and territories, 1986
- 10. Internal migrants 5 years and over by place of residence in 1986, age groups and sex, showing place of residence in 1981, for the provinces and territories, 1986
- 11. Internal migrants 5 years and over by migration status 1981-1986, age groups and sex, showing lifetime migration, for Canada, provinces and territories, 1986

93-109 Ethnicity, Immigration and Citizenship

This publication presents data on population distribution by ethnic origin, period of immigration, citizenship, immigrant and non-immigrant populations by place of birth. One table provides comparison to the 1981 Census data for the immigrant population by place of birth.

Table Titles**Part 1 - Ethnic Origin**

- 1. Population by ethnic origin and sex, for Canada, provinces and territories, 1986
- 2. Population by ethnic origin and sex, showing single and multiple origins, for Canada, provinces and territories, 1986
- 3. Population by selected ethnic origins and sex, showing single and multiple origins by age groups, for Canada, provinces and territories, 1986
- 4. Population by ethnic origin and sex, showing selected multiple ethnic origin combinations, for Canada, provinces and territories, 1986

Part 2 - Immigration

- 5A. Non-immigrant population by place of birth and sex, for Canada, provinces and territories, 1986
- 5B. Immigrant population by place of birth and sex, for Canada, provinces and territories, 1986
- 6A. Non-immigrant population by place of birth and sex, showing age groups, for Canada, provinces and territories, 1986
- 6B. Immigrant population by place of birth and sex, showing age groups, for Canada, provinces and territories, 1986

93-109 Ethnicity, Immigration and Citizenship - Part 2 - Concluded

7. Population by citizenship and sex, showing period of immigration, for Canada, provinces and territories, 1986
8. Immigrant population by place of birth and sex, for Canada, provinces and territories, 1981 and 1986

93-110 Schooling and Major Field of Study

Data on level of schooling and major field of study for Canada, the provinces and territories are presented. All tables refer to the population 15 years and over (excluding institutional residents).

Table Titles

1. Population 15 years and over by age groups and sex, showing highest level of schooling, for Canada, provinces and territories, 1951 to 1986^(*)
2. Population 15 years and over by age groups and sex, showing highest level of schooling, for Canada, provinces and territories, 1986
3. Population 15 years and over by sex and detailed highest level of schooling, for Canada, provinces and territories, 1986
4. Population 15 years and over by age groups and sex, showing highest degree, certificate or diploma, for Canada, provinces and territories, 1986
5. Population 15 years and over with trades certificate or postsecondary degree, certificate or diploma by detailed major field of study, age groups and sex, for Canada, provinces and territories, 1986
6. Population 15 years and over with trades certificate or postsecondary degree, certificate or diploma by major field of study minor groups and sex, showing highest degree, certificate or diploma, and median years of postsecondary schooling, for Canada, provinces and territories, 1986
7. Number and percentage of the population 15 years and over by sex and secondary school graduation certificate, showing age groups, for Canada, provinces and territories, 1986

(*) Based on 100% data in 1951 and 1961, on 33 1/3% sample data in 1971 and 1976, and on 20% sample data in 1981 and 1986.

93-110 Schooling and Major Field of Study - Concluded

- 8A. Population 15 to 64 years by sex, participation rate, unemployment rate and age groups, for selected educational groups (**), for Canada, provinces and territories, 1986
- 8B. Population 15 to 64 years who worked in 1985 by sex, selected labour force characteristics (***) and age groups, for selected educational groups (**), for Canada, provinces and territories, 1986
- 9. Population 15 years and over by age groups and sex, showing total years of schooling, average and median years of schooling, for Canada, provinces and territories, 1986
- 10. Population 15 years and over by age groups, sex and years of other non-university, showing total counts of trades and other non-university certificates or diplomas, for Canada, provinces and territories, 1986

93-111 Labour Force Activity

Data on the labour force activity of the population 15 years and over (excluding institutional residents) by selected demographic and educational characteristics are presented for Canada, the provinces and territories. Labour force activity data by selected demographic characteristics and by the presence of children are also given for the female population 15 years and over in occupied private households. Tables 1 and 2 contain historical labour force activity data.

Table Titles

- 1. Population 15 years and over by age groups and marital status, showing labour force activity (based on 1971 labour force concepts) by sex, for Canada, provinces and territories, 1971, 1976, 1981 and 1986
- 2. Female population 15 years and over in occupied private households by age groups, marital status and presence of children, showing labour force activity, for Canada, provinces and territories, 1981 and 1986

- (**) Includes less than Grade 9, Grades 9-13 without secondary school graduation, secondary school graduates (without further schooling), trades certificate holders (without further schooling), postsecondary other non-university graduates (without further schooling) and university graduates.
- (***) Includes percentage who worked full year, full time and average employment income for those who worked full year, full time.

93-111 Labour Force Activity - Concluded

3. Labour force activity of population 15 years and over by sex, age groups and marital status, for Canada, provinces and territories, 1986
 4. Labour force activity of population 15 years and over by sex, age groups and highest level of schooling, for Canada, provinces and territories, 1986
-

93-112 Occupation

Data on members of the labour force 15 years and over by detailed occupation, age, sex and selected labour characteristics are presented for Canada, the provinces and territories.

Table Titles

1. Labour force 15 years and over by detailed occupation and sex, showing (a) age groups and (b) class of worker, for Canada, provinces and territories, 1986
 2. Persons 15 years and over who worked since January 1, 1985 by detailed occupation and sex, showing (a) labour force activity and (b) weeks worked in 1985, total and mostly full time, for Canada, provinces and territories, 1986
-

93-113 Industry

Industry data for members of the labour force 15 years and over by age, sex and selected labour characteristics are presented for Canada, the provinces and territories.

Table Titles

1. Labour force 15 years and over by detailed industry and sex, showing (a) age groups and (b) class of worker, for Canada, provinces and territories, 1986
 2. Persons 15 years and over who worked since January 1, 1985 by detailed industry and sex, showing (a) labour force activity and (b) weeks worked in 1985, total and mostly full time, for Canada, provinces and territories, 1986
-

93-114 Total Income: Individuals

This publication presents 1985 income size distributions for the population 15 years and over by sex, age, marital status, sources of income, major source of income, highest level of schooling, period of immigration, mother tongue, ethnic origin and major field of study. One table also includes 1980 income size distributions from the 1981 Census in constant (1985) dollars.

93-114 Total Income: Individuals - ConcludedTable Titles

1. Population 15 years and over by sex and 1980 and 1985 income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
2. Population 15 years and over with income by sex and 1985 income groups, showing the number reporting and the aggregate amount reported for each source of income, for Canada, provinces and territories, 1986
3. Population 15 years and over with income by sex, major source of income and 1985 income groups, for Canada, provinces and territories, 1986
4. Population 15 years and over by sex, marital status and 1985 income groups, for Canada, provinces and territories, 1986
5. Population 15 years and over by sex, age groups and 1985 income groups, for Canada, provinces and territories, 1986
6. Population 15 years and over by sex, highest level of schooling and 1985 income groups, for Canada, provinces and territories, 1986
7. Population 15 years and over with postsecondary qualifications by sex and major field of study, showing 1985 income groups, for Canada, provinces and territories, 1986
8. Population 15 years and over by sex, period of immigration and 1985 income groups, for Canada, provinces and territories, 1986
9. Population 15 years and over by sex, mother tongue and 1985 income groups, for Canada, provinces and territories, 1986
10. Population 15 years and over by sex, ethnic origin and 1985 income groups, for Canada, provinces and territories, 1986

93-115 Employment Income: Individuals

This publication presents 1985 employment income size distributions for the population 15 years and over by sex, age, work activity in 1985, class of worker, number of weeks worked in 1985, highest level of schooling, major field of study, mother tongue, official language and 1985 wage and salary size distributions by sex and age. Also included is one table showing 1980 employment income size distributions from the 1981 Census in constant (1985) dollars.

Table Titles

1. Population 15 years and over by sex and 1980 and 1985 employment income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986

93-115 Employment Income: Individuals - Concluded

2. Population 15 years and over by sex, age groups and 1985 employment income groups, for Canada, provinces and territories, 1986
3. Population 15 years and over by sex, highest level of schooling and 1985 employment income groups, for Canada, provinces and territories, 1986
4. Population 15 years and over with postsecondary qualifications by sex and major field of study, showing 1985 employment income groups, for Canada, provinces and territories, 1986
5. Population 15 years and over with postsecondary qualifications by sex, presence of university degree and major field of study, showing 1985 employment income groups, for Canada, 1986
6. Population 15 years and over by sex, mother tongue and 1985 employment income groups, for Canada, provinces and territories, 1986
7. Population 15 years and over by sex, work activity, official language and 1985 employment income groups, showing mother tongue, for Canada, 1986
8. Population 15 years and over by sex, number of weeks worked in 1985, whether these weeks were mostly full time or part time and by 1985 employment income groups, for Canada, provinces and territories, 1986
9. Population 15 years and over by sex, work activity in 1985, class of worker and 1985 employment income groups, for Canada, provinces and territories, 1986
10. Paid workers 15 years and over by sex, age groups and 1985 wage and salary groups, for Canada, provinces and territories, 1986
11. Paid workers 15 years and over by sex, number of weeks worked in 1985, whether these weeks were mostly full time or part time and by 1985 wage and salary groups, for Canada, provinces and territories, 1986

93-116 Employment Income by Occupation

Average employment income for 1980 and 1985 in constant (1985) dollars for the population 15 years and over are presented by sex, work activity and detailed occupation. Tables of 1985 average employment income and 1985 average wages and salaries by selected characteristics and detailed occupation are also included.

Table Titles

1. Population 15 years and over with employment income by sex, work activity and detailed occupation, showing number and average 1980 and 1985 employment income in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986

93-116 Employment Income by Occupation - Concluded

2. Population 15 years and over with employment income who worked full year, full time in 1985 by sex, highest level of schooling, age groups and detailed occupation, showing number and average 1985 employment income, for Canada, 1986
3. Paid workers 15 years and over with wages and salaries by sex, work activity and detailed occupation, showing number and average 1985 wages and salaries, for Canada, 1986

93-117 Family Income: Census Families

This publication presents 1985 income size distributions for census families and non-family persons in private households by family structure, sources of income, major source of income, number and combination of employment income recipients, number of persons in the household, 1985 work activity, age, level of schooling and period of immigration. One table each for census families and non-family persons also includes 1980 income size distributions from the 1981 Census in constant (1985) dollars.

Table Titles

- 1A. Census families in private households by family structure and 1980 and 1985 family income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
- 1B. Non-family persons in private households, 15 years and over, by sex and 1980 and 1985 income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
- 2A. Census families in private households, with income, by family structure and 1985 family income groups, showing the number reporting and the aggregate amount reported for each source of income, for Canada, provinces and territories, 1986
- 2B. Non-family persons in private households, 15 years and over, with income, by sex and 1985 income groups, showing the number reporting and the aggregate amount reported for each source of income, for Canada, provinces and territories, 1986
- 3A. Census families in private households, with income, by family structure, major source of income and 1985 family income groups, for Canada, provinces and territories, 1986
- 3B. Non-family persons in private households, 15 years and over, with income, by sex, major source of income and 1985 income groups, for Canada, provinces and territories, 1986

93-117 Family Income: Census Families - Concluded

- 4A. Census families in private households by family structure and age of husband/parent, showing 1985 family income groups, for Canada, provinces and territories, 1986
- 4B. Non-family persons in private households, 15 years and over, by sex and age groups, showing 1985 income groups, for Canada, provinces and territories, 1986
- 5A. Census families in private households by family structure, work activity in 1985 of husband/parent and 1985 family income groups, for Canada, provinces and territories, 1986
- 5B. Non-family persons in private households, 15 years and over, by sex, work activity in 1985 and 1985 income groups, for Canada, provinces and territories, 1986
- 6. All census families and husband-wife census families in private households by highest level of schooling of husband/parent, showing 1985 family income groups, for Canada, provinces and territories, 1986
- 7. Census families in private households by family structure, by number and combination of employment income recipients, showing 1985 family income groups, for Canada, provinces and territories, 1986
- 8. Census families in private households by period of immigration of husband/parent, showing 1985 family income groups, for Canada, provinces and territories, 1986
- 9. Census families in private households by family structure and number of persons, showing 1985 family income groups, for Canada, provinces and territories, 1986
- 10. Husband-wife census families in private households with husbands under 65 years, by work activity in 1985 of husband and wife and 1985 family income groups, for Canada, provinces and territories, 1986

93-118 Family Income: Economic Families

This publication presents 1985 income size distributions for economic families and unattached individuals by family structure and family characteristics and the composition of their total income by selected characteristics. In addition, the publication includes statistics on the incidence of low income among families, unattached individuals and population in private households by a number of variables such as family size, number of children, education and ethnic origin of husband/reference person, sex and age of family members, etc. Also included are the distribution of economic families by the size of difference between their 1985 income and the applicable low income cut-off.

93-118 Family Income: Economic Families - ConcludedTable Titles

- 1A. Economic families in private households by family structure and 1980 and 1985 family income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
- 1B. Unattached individuals 15 years and over in private households by sex and 1980 and 1985 income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
2. Economic families in private households by family characteristics and 1985 family income groups, for Canada, provinces and territories, 1986
- 3A. Economic families in private households with income by selected characteristics, showing the number reporting and the aggregate amount reported for each source of income in 1985, for Canada, provinces and territories, 1986
- 3B. Unattached individuals 15 years and over in private households with income by selected characteristics, showing the number reporting and the aggregate amount reported for each source of income in 1985, for Canada, provinces and territories, 1986
- 4A. Economic families and persons in economic families in private households by selected characteristics, showing 1985 income status, for Canada and provinces, 1986
- 4B. Unattached individuals 15 years and over in private households by selected characteristics, showing 1985 income status, for Canada and provinces, 1986
5. All persons in economic families in private households by selected characteristics, showing 1985 income status, for Canada and provinces, 1986
6. Population in private households by economic family status and 1985 income status, showing census family status, for Canada, 1986
- 7A. Distribution of economic families in private households by family size, 1985 income status and size of difference between family income and low income cut-off, for Canada and provinces, 1986
- 7B. Distribution of unattached individuals 15 years and over in private households by sex, 1985 income status and size of difference between total income and low income cut-off, for Canada and provinces, 1986

93-119 Household Income: Private Households

This publication presents 1985 income size distributions for private households by household type, tenure, number of persons, presence and number of children, sources of income and selected characteristics of household maintainer. A table of 1980 household income size distributions from the 1981 Census in constant (1985) dollars is also included.

Table Titles

1. Private households by type and 1980 and 1985 household income groups in constant (1985) dollars, for Canada, provinces and territories, 1981 and 1986
2. Private households by type and 1985 household income groups, for Canada, provinces and territories, 1986
3. Private households by type, number of persons and 1985 household income groups, for Canada, provinces and territories, 1986
4. Private households by relationship of household members and 1985 household income groups, for Canada, provinces and territories, 1986
5. Private households by type, number of persons 65 years and over and 1985 household income groups, for Canada, provinces and territories, 1986
6. Private households by selected characteristics of household maintainer and 1985 household income groups, for Canada, provinces and territories, 1986
7. Private households by selected characteristics, showing the number reporting and aggregate amount reported for each source of income in 1985, for Canada, provinces and territories, 1986
8. Private family households by number of children under 18 years and 1985 household income groups, for Canada, provinces and territories, 1986
9. Private family households by presence and combination of children under 25 years and 1985 household income groups, for Canada, provinces and territories, 1986
10. Private non-farm households by household tenure and 1985 household income groups, for Canada, provinces and territories, 1986

DIMENSIONS SERIES (Previously Called "Special Interest")

This series provides information on selected topics for which there has been considerable interest expressed. Publications focus on geographic areas (e.g., census metropolitan areas), subpopulations (e.g., immigrants) or a subject (e.g., occupational trends). Data presentation varies from basic summary data to detailed breakdowns and cross-tabulations. Geographic levels also vary, e.g., Canada only, Canada, provinces and territories, census metropolitan areas.

93-151 Occupational Trends, 1961-1986

This publication contains data on occupational trends for the labour force 15 years and over by sex, for Canada, the provinces and territories, 1961, 1971, 1981 and 1986. The data are presented according to the 1971 classification and using as far as possible the 1971 Census definition of the labour force. Occupation data for 1961 are based on a recoded sample of the 1961 Census data which has been weighted.

93-152 Industry Trends, 1951-1986

This publication presents data on industry trends for the labour force 15 years and over by sex, for Canada, the provinces and territories, 1951, 1961, 1971, 1981 and 1986. The data are based on the 1970 Standard Industrial Classification and, as far as possible, the 1971 Census definition of the labour force.

93-153 Language Retention and Transfer

This publication contains five tables, which cross-classify the following variables: ethnic origin, mother tongue, language spoken at home, knowledge of official languages, age groups and sex. The time-series data (1981-1986) are also included. Data are provided for Canada, provinces and territories. Selected tables include information for the census metropolitan areas of Montréal and Ottawa-Hull.

93-154 Profile of Ethnic Groups

This publication profiles selected ethnic groups. For each group, single and multiple origins are shown by selected demographic, social and economic characteristics such as age, marital status, mother tongue, education and income. The level of geography is Canada only.

93-155 Profile of the Immigrant Population

Data on the selected characteristics of the immigrant population are presented for Canada, the provinces and territories. The immigrant population is shown by period of immigration and sex, cross-classified by other variables such as age, marital status, mother tongue, education and income. Data on the non-immigrant population are also presented.

93-156 Census Metropolitan Areas

This publication provides data covering a wide range of census variables for the 25 census metropolitan areas. The tables contain more detailed distributions and cross-classifications than can be obtained from the "Profiles" series.

Information is provided on demographic, social, cultural, mobility, economic, family, household and dwelling characteristics. In addition, some tables include data from the 1981 Census to add a historical perspective. The 1981 boundaries have been adjusted to compare with the CMA boundaries established for 1986.

The publication is divided into two main sections which present 100% data and 20% sample data.

93-157 Canadians and Their Occupations: A Profile

This publication presents data for approximately 200 selected detailed occupations by sex showing a range of demographic, economic and socio-cultural characteristics for Canada. The occupation data are presented according to the 1980 Standard Occupational Classification.

PROFILE SERIES

This series is a statistical overview of geographic areas. A wide range of census variables are covered in limited detail. Variables include:

- demography
- mobility
- ethno-cultural characteristics
- language
- schooling
- labour force characteristics
- income
- families
- households
- dwellings

Typically, the variables are not cross-tabulated and a limited number of indicators such as percentages and rates are shown. Separate profiles will be published for the 100% data and the 20% sample data.

A total of 105 publications is proposed for this series.

Appendix A is an example of a profile (100% data) for census divisions and census subdivisions.

For the 1986 Profile Series, information on the population 65 years of age and over has been added. Other variable categories such as mother tongue, home language and ethnic origin have been expanded. In addition, incidence reporting - the listing of those categories that have the highest counts within selected variables - has been introduced.

Incidence reporting will be based on the following:

- Total provincial or territorial counts for census division and census subdivision profiles. For example, mother tongue data will include the five non-official languages in each province that have the highest counts.
- Highest counts of each individual census-tracted centre for profiles of census tracts and component census subdivisions.
- Highest counts in Canada for all other profiles.

94-101 Census Divisions and Subdivisions (CDs and CSDs) to

94-124 For each province and territory, a 100% data and a 20% sample data profile is presented by census divisions and census subdivisions. An alphabetical place name index with page references is included. (See Appendix A for an example of a 100% CD and CSD profile.)

94-125 Federal Electoral Districts (FEDs)
and

94-126 The 100% data and 20% sample data profiles for federal electoral districts contain more detail than their CSD counterparts because FEDs have larger populations.

94-127 Census Metropolitan Areas and Census Agglomerations (CMAs/CAs)
and

94-128 The 100% data and 20% sample data profiles for census metropolitan areas and census agglomerations contain, like the FED profiles, more detail than their CSD counterparts.

Note: Component census subdivisions of CMAs/CAs are shown in census tract publications.

94-129 Urban and Rural Areas
and

94-130 The 100% data and 20% sample data profiles for urban and rural areas, for Canada, the provinces and territories are similar to their CMA/CA counterpart.

94-131 Labour Force Survey Economic Regions

A 20% sample data profile provides background data for the new (January 1985) Labour Force Survey Economic Regions which are based on information collected from the 1986 Census of Population. It will allow users to put the current Labour Force Survey estimates for economic regions in the context of the social, demographic and economic characteristics of the population as measured in June 1986. The content is similar to the profile for CMAs/CAs.

95-101 Census Tracts
to

95-174 A 100% and a 20% sample data profile for each census-tracted centre provide data for census tracts and components (CSDs) of census metropolitan areas and selected census agglomerations (census-tracted centres). The content is similar to the profile for CDs/CSDs.

ANALYTICAL

Two series present data in other forms than strictly tables:

- Metropolitan Atlas Series
 - Focus on Canada Series
-

METROPOLITAN ATLAS SERIES

98-101 to 98-112 A series of 12 publications covering Canada's major census metropolitan areas combine maps, graphs and text to present the 1986 Census data in an easy-to-understand format. Key demographic, housing, social and economic themes emphasize important characteristics of metropolitan areas. Maps summarize these complex statistics and pinpoint areas of concentration, facilitate comparisons and reveal changing patterns - helping us to better understand the cities we live in. The series includes:

- | | |
|---------------|-------------|
| • St. John's | • Hamilton |
| • Halifax | • Winnipeg |
| • Québec | • Regina |
| • Montréal | • Calgary |
| • Ottawa-Hull | • Edmonton |
| • Toronto | • Vancouver |
-

FOCUS ON CANADA SERIES (Previously Called "Content Series")

The Focus on Canada Series, a series covering 16 popular topics supported by simple tables and charts,* covers all of the broad subject fields of the 1986 Census, i.e. demography, schooling, ethno-cultural, labour, income and housing. Most of the studies in this series include some historical data from past censuses.

98-120 Canada's Population from Ocean to Ocean

This study provides a historical overview of population changes and regional distributions with an analysis of changes in the more recent period. Special attention has been paid to the belt along the border with the United States. The report also covers changes in population distributions of subregions such as census metropolitan areas and census subdivisions.

* The small size of the 16 studies in the Focus on Canada Series restricts the presentation of most data to the national level. In many cases, it will be possible, through the Custom Products Service, to produce similar data for specified geographic areas and population groups.

98-121 Canada's Seniors

This study reviews the growth in the size of the elderly population and its changing composition by sex, marital status, etc., during the period 1976 to 1986. In addition, the rapid growth among the "oldest" old and some of its implications are analysed. The study also examines patterns of population aging in Canada and in other selected countries including Japan, the United States, the United Kingdom, Sweden, etc.

98-122 Canada's North, A Profile

This study presents a demographic and socio-economic profile of the population living in the northern regions of Canada. The analysis highlights selected aspects such as linguistic diversity, education levels, labour and income characteristics, housing conditions, etc.

98-123 The Inner City in Transition

This study examines the popular belief that the inner city has changed from an area of low value housing stock and a low income population to an area of increased value housing stock (through restoration and renovation) with a relatively well off population. To this end, changes in the demographic, socio-cultural and economic characteristics of the population in the inner cities of selected metropolitan areas are examined using data from the 1986 and earlier censuses.

98-124 Canada's Youth

This study presents a demographic and socio-economic profile of the young population of Canada. The analysis highlights their education, work activity, income and housing characteristics.

98-125 The Work Women Do

This study analyses the three segments of the adult female population: the employed, those in transition and those not in labour force. The selected characteristics to be examined include occupation, work activity, class of worker and income. Using supplementary data from related surveys, the characteristics of those who are unemployed and those who have left the labour force or never joined it are also analysed.

98-126 A Profile of the Disabled in Canada

The 1986 Census identified the disabled population for the first time. Based on this, further data were collected through a post-census sample survey to present this profile of the disabled in Canada.

98-127 Families in Canada

This study describes recent demographic trends and their role in creating a diversity of families in Canada. The analysis takes into account living arrangements, family structure, presence and age of children and labour force participation of family members.

98-128 Family Income

This study concentrates on an examination of changes in family income between 1980 and 1985 in terms of constant (1985) dollars by selected characteristics such as family structure, life cycle, work activity and major source of income. The composition of various income classes and the sources of total income are briefly analysed. The study highlights the relative position of various regions.

98-129 Employment Income

This study highlights the major differences in the employment income of various population groups. Classified by sex, average employment income is examined by age, marital status, education, work activity and occupation. Provincial differences are presented briefly. The study also includes a short analysis of changes in employment income between 1980 and 1985.

98-130 Affordability of Housing in Canada

This study focuses on how much Canadians spend on housing in relation to their income. Trends in dwelling types, housing prices, costs and household incomes are presented and regional differences discussed. The study will examine the characteristics of those households whose shelter costs to income ratios are significantly below or above average.

98-131 Canada - A Linguistic Profile

This study analyses three aspects of this topic in Canada. First, the evolution of the diversity of languages is presented. Secondly, the strength of the English language to attract and assimilate other languages is examined. Finally, the progress towards a bilingual society, with English and French as the two official languages, is investigated.

98-132 Ethnic Diversity in Canada

This study reviews the changing ethnic profile of Canada and the distribution of major ethnic groups. It examines the applicability of cultural mosaic and melting pot concepts to the Canadian situation. Special attention is focussed on the population reporting multiple ethnicity. The role played by immigration is incorporated into the analysis.

98-133 Canada's Farm Population

This study presents a brief historical review of the changes in farm population over the past decades and analyses differences between farm and non-farm populations in respect of such characteristics as age, marital status, labour force activity, income, etc. The study also examines the socio-economic characteristics of farm operators.

98-134 Educational Attainment of Canadians

This study highlights the changes in the educational stock in Canada over the last quarter of a century. The 1986 Census collected information on the major field of study of all postsecondary graduates. Special attention is devoted to an analysis of broad groups of major field of study by socio-demographic and economic characteristics.

98-135 Trends in Occupation and Industry

This study presents an industry-occupation employment structure as revealed by the 1986 Census and includes trend analysis between 1971 and 1986. The study also examines changes in the distribution of the experienced labour force among occupations and industries between 1971 and 1986.

GENERAL AND GEOGRAPHIC REFERENCE

General and Geographic Reference products increase the accessibility and usefulness of publications, custom products and other output modes.

REFERENCE PRODUCTS (GENERAL)

These publications help data users understand census concepts, products and services.

99-101 1986 Census Dictionary

Assists in understanding census data with:

- universes, variables and geographic area definitions;
 - notes on similar data from past censuses and historical comparability;
 - possible responses for each variable.
-

99-102 1986 Census Products and Services - Preliminary Edition

Provided full details of products and services from the 100% data base and a summary of products and services from the 20% sample data base.

99-103 1986 Census Products and Services - Final Edition

Provides full details of products and services from the 100% data base and the 20% sample data base. This edition replaces the preliminary one.

99-104 1986 Census Handbook

Draws together census information from many sources and is a convenient "first stop" for both new and experienced data users.

99-105 1986 Census Reference Paper Series - Census Metropolitan Areas and Census Agglomerations: A 1986-1981 Comparison

Provides comparisons of 1986 census metropolitan areas (CMAs) and census agglomerations (CAs) and their 1981 versions. The publication lists census subdivisions that make up the 1986 version of each CMA and CA, and shows corresponding delineations for 1981.

99-106 1986 Census Reference Paper Series - 1986 Census Geography: A Historical Comparison

This publication is designed to aid users in the comprehension of standard geographic terms. In addition, it also compares geographic terms associated with the 1986 Census to those of previous censuses.

GEOGRAPHIC REFERENCE PRODUCTS

These 13 publications assist in the use and interpretation of census data. They are intended to be reference tools rather than data sources and include:

- Maps
- Enumeration Area Reference Lists
- Equivalent Enumeration Areas, 1986 and 1981

MAPS

Two publications, national in scope, contain reference maps for CDs, CSDs, CMAs and CAs. These maps are also available unbound and are included where appropriate in data publications.

***99-115 Census Divisions and Subdivisions**

99-116 Census Metropolitan Areas and Census Agglomerations

* The same series of maps appears in Volume II of the 1986 Standard Geographical Classification Manual, Catalogue No. 12-572.

ENUMERATION AREA REFERENCE LISTS

This series includes 10 publications that link EAs to higher census geographic levels. The publications in this series are:

- 99-117 Census Divisions and Subdivisions, Atlantic Provinces
 - 99-118 Census Divisions and Subdivisions, Quebec
 - 99-119 Census Divisions and Subdivisions, Ontario
 - 99-120 Census Divisions and Subdivisions, Western Provinces and the Territories
 - 99-121 Census Tracts
 - 99-122 Provincial Census Tracts, Atlantic Provinces
 - 99-123 Provincial Census Tracts, Quebec
 - 99-124 Provincial Census Tracts, Ontario
 - 99-125 Provincial Census Tracts, Western Provinces and the Territories
 - 99-126 Census Metropolitan Areas and Census Agglomerations
-

99-127 EQUIVALENT ENUMERATION AREAS, 1986 AND 1981

Shows geographically equivalent enumeration areas for 1981 and 1986 by FED.

Note: A 1986 Standard Geographical Classification Manual series is also published in three separate volumes.

Volume I, The Classification, Catalogue No. 12-571

Volume II, The Reference Maps, Catalogue No. 12-572

Volume III, The Changes from 1981 to 1986, Catalogue No. 12-573

LIST OF PUBLICATIONS

This section lists all of the publications referred to in the previous pages. For each of these publications, classified by the series in which it is found, the number, title, price and planned release date are given.

99-127	Equivalent Enumeration Areas, 1986 and 1981	50.00	2nd Quarter 1988

MACHINE-READABLE TABLES AND PROFILES

The Basic Summary Tables are designed to meet the needs of users who wish to study the characteristics of small areas. They feature more detailed data than those included in the publications. Profiles in publications do not lend themselves easily to aggregation and manipulation of data. Both tables and profiles have, therefore, been put on magnetic tape, thus making data analysis much easier. Some of them can also be obtained on other electronic support media. For further information, please contact the Electronic Data Dissemination Division, (613) 951-8200.

MACHINE-READABLE TABLES

Description

The Basic Summary Table series is made up of 43 cross-classifications, each of which features two or three variables and deals with one of the following topics: demography, mobility, ethno-cultural characteristics, language, schooling, labour force characteristics, income, families, households and dwellings.

The tables are produced for the following three geographic levels: (i) enumeration areas (EAs) and federal electoral districts (FEDs), (ii) census subdivisions (CSDs) and census divisions (CDs), (iii) census tracts (CTs), census metropolitan areas (CMAs), tracted census agglomerations (CAs) and provincial census tracts (PCTs). Because the tables are prepared for small geographic areas, only the main categories of variables will enter into their composition.

List

A list of all the basic summary tables follows. Each table is identified by a number.

For example: DM86A01

The first two characters ("DM") identify the subject area, "86" is the census year, "A" or "B" identifies the data base (that is, "A" means 100% of households and "B" means 20% of households) and the last two digits are the table number within each subject area.

The number of categories presented, including totals and subtotals, is shown in brackets for each variable. For example "sex (3)" means that there are 3 categories - "males", "females", and "total". Another example, "age (8)" and "age (8A)" would indicate that there are two different breakdowns of eight categories for the variable "age". Further details on these breakdowns are available on request.

Basic Summary Tables (Based on 100% Data)

Demography

DM86A01	Population by five-year age groups (17) and sex (3)
DM86A02	Population by age groups (8A) and sex (3), showing marital status (6)

Mother Tongue

MT86A01	Population by selected mother tongues (25) and sex (3)
---------	--

Dwellings

DW86A01	Occupied private dwellings by structural type (5) and tenure (4), showing age of household maintainer (6)
DW86A02	Occupied private dwellings by structural type (5), showing number of persons per household (13)

Households

HH86A01	Private households by type (23), showing tenure of household (4A)
HH86A02	Private households by type of household (12), showing number of persons per household (13)

Families

CF86A01	Census families in private households by number of persons in census families (10), showing family structure (5)
CF86A02	Census families in private households by number of children at home (14), showing family structure (5)
CF86A03	Census families in private households by age groups of children at home (13), showing family structure (5)
CF86A04	Population in private households by census family status, age (24) and sex (3)

Basic Summary Tables (Based on 20% Sample Data) - Continued

Ethno-cultural

EC86B01	Population by ethnic origin (21) and sex (3)
EC86B02	Population by place of birth (20) and sex (3)
EC86B03	Immigrant population by period of immigration (7), sex (3) and age at immigration (4)

Mobility

MB86B01	Population 5 years and over by age groups (8), sex (3) and mobility status (8) (province level mobility)
---------	--

Language

LA86B01	Population by official language (5), age groups (8A) and sex (3)
LA86B02	Population by home language (25) and sex (3)

Households

HH86B01	Private households in owner-occupied non-farm, non-reserve dwellings by type of household (12) and owner's major payments (6)
HH86B02	Private households in tenant-occupied non-farm, non-reserve dwellings by type of household (12) and gross rent (6)
HH86B03(A)	Private households in owner-occupied non-farm, non-reserve dwellings by owner's major payments as a percentage of 1985 household income (8) and age of household maintainer (6)
HH86B03(B)	Private households in tenant-occupied non-farm, non-reserve dwellings by gross rent as a percentage of 1985 household income (8) and age of household maintainer (6)

Dwellings

DW86B01	Occupied private dwellings by structural type (5) and principal heating fuel (9)
DW86B02	Occupied private dwellings by structural type (5) and period of construction (9)
DW86B03	Owner-occupied private non-farm, non-reserve dwellings by value of dwellings (11) and structural type (5)

Basic Summary Tables (Based on 20% Sample Data) - Continued

Dwellings - Concluded

- DW86B04 Occupied private dwellings by structural type (5) and number of persons per room (7)
- DW86B05 Occupied private dwellings by main type of heating equipment (7), showing principal heating fuel (9)

Schooling

- SC86B01 Population 15 years and over by highest level of schooling (7), sex (3) and age groups (7)
- SC86B02 Population 15 years and over by major field of study (13) and sex (3)

Labour Force Characteristics

- LF86B01 Population 15 years and over by labour force activity (7), age groups (7) and sex (3)
- LF86B02 Population 15 years and over by labour force activity (7), sex (3) and marital status (6)
- LF86B03 Population 15 years and over by labour force activity (7), highest level of schooling (8) and sex (3)
- LF86B04 Labour force 15 years and over by occupation major groups (25) (based on the 1980 classification) and sex (3)
- LF86B05 Labour force 15 years and over by industry divisions (21) (based on the 1980 classification - "Unspecified or undefined" distributed among industry divisions) and sex (3)
- LF86B06 Labour force 15 years and over by class of worker (5) and sex (3)
- LF86B07 Population 15 years and over by work activity in 1985 (14) (number of weeks worked in 1985 and whether these weeks were mostly full or part time) and sex (3)
- LF86B08 Labour force activity (4) of females 15 years and over in occupied private households by presence of children (6)
- LF86B09 Labour force 15 years and over by industry divisions (15) (based on the 1970 classification - "Unspecified or undefined" shown as a separate division) and sex (3)

Basic Summary Tables (Based on 20% Sample Data) - Concluded

Income

IN86B01	Number, aggregate and average income of population 15 years and over in private households by sex (3) and 1985 income groups (2)
IN86B02	Number, aggregate and average income of census families in private households
IN86B03	Number, aggregate and average income of unattached individuals 15 years and over in private households by sex (3)
IN86B04	Number, aggregate and average income of private households
IN86B05	Number, aggregate and average employment income of population 15 years and over who worked in 1985 and reported employment income by sex (3)
IN86B06	Number, aggregate and average income of non-family persons 15 years and over in private households by sex (3)
IN86B07	Number, aggregate and average income of economic families in private households

Price

Two formulas have been devised for the pricing of basic summary tables for standard geographic areas. The standard formula applies to data on tape, paper or diskette for a large volume of data. This formula reads as follows:

Tape: \$300 + \$0.05 per enumeration area
 \$0.10 per census subdivision
 \$0.15 per census tract

Diskette: Same as tape, with the added charge of \$50 per second and subsequent diskette.

Paper: Same as tape, with the added charge of \$0.01 per page above 100.

The other formula applies in cases of small volume of data on diskette or paper. It reads as follows:

Diskette: \$125 + \$1.00 per enumeration area
 \$3.00 per census subdivision
 \$3.00 per census tract
 + \$50 per second and subsequent diskette

Paper: \$25 + \$1.00 per enumeration area
 \$3.00 per census subdivision
 \$3.00 per census tract
 + \$0.01 per page above 100.

Precise prices are available for standard regions such as provinces and CMAs, as well as for a few other special packages. Prices include handling and delivery by registered mail in Canada. Prices are subject to change.

Availability

Basic summary tables based on 100% data will be available in the fourth quarter of 1987 and in the first quarter of 1988, while the tables based on the 20% sample data should be released during the last three quarters of 1988. Announcement of availability of each table will be carried in the Statistics Canada Daily.

MACHINE-READABLE PROFILES

Description

The concept of profiles is discussed on page 29 and a description of the content is featured on pages 29 and 30. The machine-readable profiles will generally contain exactly the same univariate distributions of data as found in the publications. Two profiles are available, the first presenting data collected for 100% of the population, and the second presenting data collected from a 20% sample.

Machine-readable profiles are available on magnetic tape, and on diskette in certain cases, for the following geographic areas:

- census divisions and subdivisions
- federal electoral districts
- census-tracted centres (CTs and component subdivisions)
- census metropolitan areas and census agglomerations
- enumeration areas

Profiles for Labour Force Survey Economic Regions and urban and rural areas can be obtained in machine-readable form upon request.

Price

Two formulas have been devised for the pricing of census profiles for standard geographic areas. The standard formula applies to data on tape, paper or diskette for a large volume of data. This formula reads as follows:

Tape:

- 100% data (2A): \$500 + \$0.15 per enumeration area
 \$0.25 per census subdivision
 \$0.25 per census tract
- 20% sample data (2B): \$500 + \$0.45 per enumeration area
 \$0.75 per census subdivision
 \$0.75 per census tract

Diskette: Same as tape, with the added charge of \$50 per second and subsequent diskette.

Paper: Same as tape, with the added charge of \$0.01 per page above 100.

The other formula applies in cases of small volume of data on diskette or paper. It reads as follows:

- 100% data profiles (2A)

Diskette: \$125 + \$2.75 per enumeration area
 \$7.50 per census subdivision
 \$7.50 per census tract
 + \$50 per second and subsequent diskette

Paper: \$25 + \$2.75 per enumeration area
 + \$0.01 per page above 100.

- 20% sample data profiles (2B)

Diskette: \$125 + \$7.50 per enumeration area
 \$20.00 per census subdivision
 \$20.00 per census tract
 + \$50 per second and subsequent diskette

Paper: \$25 + \$7.50 per enumeration area

Precise prices are available for standard regions such as provinces and CMAs, as well as for a few other special packages. Prices include handling and delivery by registered mail in Canada. Prices are subject to change.

Availability

1986 Census profiles based on 100% data will be available in the fourth quarter of 1987 and in the first quarter of 1988, while the profiles based on the 20% sample data should be released during the third and fourth quarter of 1988. Announcement of availability of each profile will be carried in the Statistics Canada Daily.

MAPS

Most of the standard census geographic areas are presented on maps in publications: in some cases as separate map bulletins and in other cases included with the data publications. However, in addition to the small scale reference maps in the publications, larger, more detailed maps described below are available by contacting your nearest Statistics Canada Regional Reference Centre.

These maps enable users to locate and identify census geographic areas and relate statistical data to the corresponding geographic area.

INDIVIDUAL MAPS, "G86" SERIES

Eight series of reference maps, at various levels of detail, are available for all census geostatistical areas of the 1986 Census. Most maps are available in the following media:

- | | |
|-------------------|--|
| Ozalid paper | - blueprint, whiteprint or diazo paper
- used to make positive line prints from translucent originals |
| Intermediate film | - used to generate ozalid paper hard copy and for use as a second original (to protect original from excessive handling) |
| Ozopaque film | - a matte surface film coated on a white opaque polyester base
- replaces ozalid cloth
- ideal for prints which will undergo rough treatment |

The following pages give descriptions and prices of these map series and the number of maps by series in each province.

Series Number	Description of Map Series	Price Per Map		
		Ozalid Paper	Intermediate Film	Ozapaque Film
G86-10*	<u>Provincial Maps</u> Show the boundaries of CDs and CSDs for each province. Map scales range from 1:250,000 in the most densely populated areas to 1:4,000,000 in the northern territories. An index map of all CDs in Canada is included in this series. The maps in this series are black and white versions of the maps included in the CD/CSD map publication (Cat. No. 99-115). Also available for census years 1971, 1976 and 1981 (G71-10, G76-10, G81-10).	\$ 5.00	\$10.00	\$15.00
G86-12*	<u>Maps of Rural Enumeration Areas</u> Show the boundaries of EAs in the rural areas of Canada. This series also shows the boundaries of CDs, CSDs and FEDs. Also available for census years 1971, 1976 and 1981 (G71-12, G76-12, G81-12).	\$ 5.00	\$10.00	\$15.00
G86-13*	<u>Maps of Census Tracts/Enumeration Areas</u> In this series, each map sheet covers one or more census tracts. FED and EA boundaries, block numbers, street names, and other physical features are identified. Address ranges are shown in many areas. Also available for census years 1971, 1976 and 1981 (G71-13, G76-13, G81-13).	\$ 5.00	\$10.00	\$15.00

* A sample of these maps is shown in Appendix B.

Series Number	Description of Map Series	Price Per Map		
		Ozolid Paper	Interme- diate Film	Ozapaque Film
G86-13A*	<u>Maps of Census Tracts/Enumeration Areas</u> Maps in this series are the same as those in the G86-13 Series above; however, these maps are reduced to a standard size and made available in booklet form. Also available for census years 1971, 1976 and 1981 (G71-13A, G76-13A, G81-13A).	\$ 1.00 per page		
G86-14*	<u>Maps of Selected Census Subdivisions</u> The maps in this series show the EAs located in the smaller urban CSDs of Canada. Each map shows a census subdivision and the streets within it. Enumeration area boundaries are shown only for those CSDs in the series with three or more EAs. For the other CSDs in the series the EA boundaries can be found on the G86-12 Series maps or they can, on request, be added on a cost-recovery basis. Also available for census years 1971, 1976 and 1981 (G71-14, G76-14, G81-14).	\$ 5.00	\$10.00	\$15.00
G86-16*	<u>Place Maps</u> The G86-16 Series consists of place maps of parts of CSDs. Each map shows the streets in the coverage area. Enumeration area boundaries are shown only where three or more EAs exist. For the other places in the series, EA boundaries can be added, on request, on a cost-recovery basis.	\$ 5.00	\$10.00	\$15.00

* A sample of these maps is shown in Appendix B.

Series Number	Description of Map Series	Price Per Map		
		Ozalid Paper	Intermediate Film	Ozapaque Film
G86-18*	<u>Maps of Federal Electoral Districts/Enumeration Areas</u> This series covers FEDs, one for each map. Scale is large enough to depict the EA boundaries. The urban FED maps show census tract as well as EA boundaries; rural FED maps show the boundaries of census divisions, census subdivisions and enumeration areas. Also available for census years 1971, 1976 and 1981 (G71-18, G76-18, G81-18).	\$ 5.00	\$10.00	\$15.00
G86-21*	<u>Maps of Provincial Census Tracts</u> The boundaries of all PCTs are shown and CMAs and CAs containing census tracts are identified. Also available for census years 1971, 1976 and 1981 (G71-21, G76-21, G81-21).	\$ 5.00	\$10.00	\$15.00

Note: A listing of G86 series of maps by FED and province is available on a PC diskette or in hard copy format.

* A sample of these maps is shown in Appendix B.

Prov.	Number of Maps by Series						
	G86-10	G86-12	G86-13	G86-14	G86-16	G86-18	G86-21

PRE-PRINTED STATISTICAL MAPS

Statistical maps are produced for popular themes such as population change and population density and are available as custom copies or in pre-printed form. Maps are produced in black and white or colour, in a variety of sizes. A sample of these maps is also shown in Appendix C.

COMPUTERIZED GEOGRAPHIC FILES

These products allow computer manipulation of geographic data both in batch and interactively. They consist of data linkage files such as the Geography Tape File and geographic files such as the Area Master File.

Geography Tape File

This file assigns to each 1986 Census enumeration area (the basic geographic unit of census data collection) all higher geographic levels by codes and names. It includes all standard geographic codes, and also locates each enumeration area centroid according to Universal Transverse Mercator (UTM) coordinates and Lambert coordinates, as well as by latitude and longitude. The final 1986 population counts and occupied private dwelling counts for all enumeration areas are also presented.

Place Name Master File

The 1986 Place Name Master File lists census divisions, census subdivisions and all unincorporated places for which 1986 population was reported. (Unincorporated place refers to any cluster of five or more permanently occupied dwellings, in rural areas, locally known by a specific name but not having a local government or legal limits.) Information given includes Standard Geographical Classification codes, census codes, type of place, location in latitude and longitude, census map number and population. For unincorporated places, a breakdown of population by enumeration areas is also given.

Postal Code Geographic Conversion File

This file matches six-character postal codes to geographic codes used by the census, and also locates each postal code according to Universal Transverse Mercator (UTM) coordinates and latitude/longitude coordinates. The file contains one or more records for each postal code.

Information for standard geographic areas can be supplied on tape, and for smaller files also on diskette or paper copy.

Area Master File

An Area Master File (AMF) contains a logical representation of all city streets and other features (such as railroad tracks, rivers and municipal boundaries) in machine-readable form. An AMF geographically references every street, address range, block-face and centroid coordinate in the coverage area. AMFs are available for most urban centres with a population of 50,000 or more.

Detailed maps can be produced from the AMFs to show the street pattern as well as the other features contained in the AMFs. Node maps are available showing the street pattern, names and node numbers (where streets and other features intersect). These maps can be used to identify user-defined areas. Maps can also be produced to show address or centroid data.

For details on AMF coverage and map availability, users should contact the Information Services Unit of the Geography Division.

Attribute File

This file contains the name of every geographic area along with its Standard Geographical Classification code or census code, as applicable, its 1981 population adjusted to 1986 boundaries, its 1986 final population, its 1986 land area, and the National Topographic System (NTS) map number.

Block-face Data Linkage File

The Block-face Data Linkage File (BFDLF) is a file relating each block-face to the Standard Geographical Classification structure and showing the population and dwelling counts. A block-face refers to one side of a city street between consecutive intersections with streets or similar physical features, for which census data are coded and stored.

Boundary Files

Generic boundary files are available for selected geographic areas, e.g., census metropolitan areas/census agglomerations, provincial census tracts and urban areas. These files consist of basic area identification and lists of coordinates to create a polygon representing the particular geographical area.

More detailed Cartographic Boundary Files, called CARTLIBs, are also available.

Cartographic Boundary File (CARTLIB)

CARTLIBs are digital cartographic libraries of the boundaries and related features of various geostatistical areas. They are stored on magnetic tape files and in conjunction with computer mapping programs can be used to map data as shown in Appendix C.

CARTLIBs are available for the following areas:

Census Year/Area	Fee	
1986 census divisions (CDs)	\$	700
1986 federal electoral districts (FEDs) (based on 1976 Representation Order)	\$	500
1986 census subdivisions (CSDs) and census consolidated subdivisions (CCSs)		
	CSD	CCS
Canada	\$ 4,200	\$ 2,800
Newfoundland	\$ 420	\$ 280
Prince Edward Island	\$ 180	\$ 150
Nova Scotia	\$ 180	\$ 150
New Brunswick	\$ 315	\$ 210
Quebec	\$ 1,440	\$ 960
Ontario	\$ 840	\$ 560
Manitoba	\$ 315	\$ 210
Saskatchewan	\$ 825	\$ 550
Alberta	\$ 420	\$ 280
British Columbia	\$ 570	\$ 380
Northwest Territories	\$ 150	\$ 150
Yukon Territory	\$ 150	\$ 150
1986 census tracts for all 25 census metropolitan areas (CMAs) (1986)		\$ 5,800
1986 census tracts for individual CMA:		
Montréal, Toronto, Vancouver	\$	700 per file
Calgary, Edmonton, Hamilton, Ottawa-Hull, Québec, Winnipeg	\$	400 per file
Chicoutimi-Jonquière, Halifax, Kitchener, London, Oshawa	\$	200 per file
Regina, Saint John, Saskatoon, Sherbrooke	\$	200 per file
St. Catharines-Niagara, St. John's, Sudbury, Thunder Bay	\$	200 per file
Trois-Rivières, Victoria, Windsor	\$	200 per file

Other standard CARTLIBs are also available for the 1976 and 1981 Census years, including CD, FED and CT coverages. Customized CARTLIB products are available for these and different coverages such as forward sortation areas (FSAs), provinces and urban areas (UAs) in different formats suitable for mapping programs such as ARC/INFO, GIMMS, ATLAS, SAS/GRAPH and STATMAP.

For further information on how to order CARTLIB files, see section "For More Information" under Electronic Data Dissemination Division or Geocartographics Sub-Division.

PART II: SERVICES

Through the services presented in this second part, users can obtain on request, a range of products that meet their specific needs.

CUSTOM DATA PRODUCTS SERVICE

The Census Custom Data Products Service provides products aimed at meeting users' needs as effectively as possible. Clients can obtain custom tabulations designed to meet their exact requirements. They themselves define the content, geographic level and medium for the product.

Production costs and delivery time vary with the type of product requested. The more customized the product is in terms of geography, variables, target populations or format, the longer the delivery time and the higher the production costs will be.

These products and services are constantly changing to meet new data and technology needs. Consequently, it is not possible to provide a detailed and up-to-date list of them in this publication. Rather, an overview of the services is provided. For precise details on the content and price of the products, contact Statistics Canada's Regional Reference Centres.

The Census Custom Data Products Service provides two types of products - semi-custom and custom. The former are less flexible than the latter in terms of content, geography and medium, and hence are available at lower cost and faster.

SEMI-CUSTOM PRODUCTS

The semi-custom products lie between the basic summary and the fully custom products in terms of the amount of flexibility available. They have been developed to meet the needs of users who require basic tabulations of data, but for specialized geographic areas or output media. By re-using many times the predetermined retrieval programs, and varying only the geographic level and output medium, costs and delivery times are reduced from those of fully custom products.

There are two main components of the Semi-custom Service: (a) cross-tabulations and (b) profiles.

CROSS-TABULATIONS

The cross-tabulation service offers to the data user a list of tables which present cross-classifications of two and three census variables. Tables selected from the list are produced for the geographic areas specified by the user, and provided on the desired medium.

The list of cross-tabulations was developed based on 1981 Census data usage and ongoing consultation with users. It includes all of the Basic Summary Cross-tabulations, any published tables which are suitable for production at small geographic levels, plus other tables specially designed for the cross-tabulation service. The list will continue to evolve throughout the census output process as new data needs and issues are identified.

Content

The cross-tabulations cover all of the census subject areas plus themes of interest, as listed below. Tables are limited, in most cases, to two or three variables in order that they may be produced for small geographic areas.

Census subject areas:

- demography;
- mobility;
- ethno-cultural characteristics;
- language;
- schooling;
- labour force characteristics;
- income;
- families;
- households; and
- dwellings.

Examples of themes of interest:

- labour market;
- the elderly;
- (other themes could be added).

Geographic Level

Semi-custom cross-tabulations will be available, within the limits imposed by the protection of confidentiality, for any geographic region specified by the user. The geographic level may be defined in terms of any of the following types of areas:

- Standard census geographic areas

Standard census areas include both political and statistical regions, such as:

- provinces and territories;
- census metropolitan areas (CMAs) and census agglomerations (CAs);
- primary census metropolitan areas (PCMAS) and primary census agglomerations (PCAs);
- census divisions (CDs);
- census subdivisions (CSDs);
- census consolidated subdivisions (CCSs);
- federal electoral districts (FEDs);
- census tracts (CTs);
- provincial census tracts (PCTs);
- urban areas (UAs);
- enumeration areas (EAs).

Standard census areas can also be added or subtracted to form special user-defined regions. For example, census tracts could be aggregated to form city planning districts, or census subdivisions aggregated to form market areas.

- Geocoded regions

Data can be retrieved for any area which can be marked on a map and geocoded. Possible formats include circles around points, grids, or other simple polygons. Examples of applications of geocoding include city wards which are defined as polygons on a map, and marketing target areas defined as circles of a specified diameter around central points.

Output Medium

Semi-custom cross-tabulations will be available on a variety of output media, including:

- computer print-out;
- magnetic tape; and
- microfiche.

Each client will specify the output medium on which the selected product is to be produced. Specialized formats, required for compatibility with computer systems or publication programs, can be provided in most cases.

Price

The prices of semi-custom cross-tabulations are dependent on the total population being counted and the number of geographic areas for which data are presented. They range from \$250 for a small city to \$2,000 for the approximately 6,000 census subdivisions in Canada.

Delivery

Tables presenting basic demographic data collected for 100% of the population are now available; detailed socio-economic data collected from a 20% sample of the population will begin to become available in the spring of 1988. A special listing of tabulations available from this service will be compiled and updated as required.

Further details on these products may be obtained from the Advisory Services staff at the nearest Statistics Canada Regional Reference Centre or from the Census Custom Products Service in Ottawa. Users are encouraged to order the products well in advance of the release dates, particularly if specialized geographic areas must be created.

SEMI-CUSTOM PROFILES

Profiles provide an overview of a selected geographic region. Through the presentation of univariate distributions, they summarize many categories of data available from the census, in a format which is compact and easy to use.

Data are presented in terms of counts, rates and averages, providing indicators which can be easily compared across geographic areas. The profiles are valuable reference tools for users requiring quick summaries of the characteristics of the selected areas. They are particularly suited to entry into systems for basic data analysis, including comparisons, graphing and mapping.

Content

The profiles provide overviews of user-specified geographic areas similar to those in the published profiles. (See Appendix A for an example of a published profile.)

The presentation of the data, also similar to that of the published profiles, is set in advance. Thus, the selected geographic regions are indicated as column headers across the top of the page, with the distributions of the variables following one another down the page.

Two profiles are available, one presenting the basic data collected for 100% of the population, and the other presenting the detailed socio-economic data collected from a 20% sample.

Geographic Level

Semi-custom data profiles will be available, within the limits imposed by the protection of confidentiality, for any geographic region specified by the user. The geographic level may be defined in terms of any of the following types of areas:

- Standard census geographic areas

Standard census areas include both political and statistical regions, such as:

- provinces and territories;
- census metropolitan areas (CMAs) and census agglomerations (CAs);
- primary census metropolitan areas (PCMAs) and primary census agglomerations (PCAs);
- census divisions (CDs);
- census subdivisions (CSDs);
- census consolidated subdivisions (CCSs);
- federal electoral districts (FEDs);
- census tracts (CTs);
- provincial census tracts (PCTs);
- urban areas (UAs);
- enumeration areas (EAs).

Standard census areas can also be added or subtracted to form special user-defined regions. For example, census tracts could be aggregated to form city planning districts, or census subdivisions aggregated to form market areas.

- Geocoded regions

Data can be retrieved for any area which can be marked on a map and geocoded. Possible formats include circles around points, grids, or other simple polygons. Examples of applications of geocoding include city wards which are defined as polygons on a map, and marketing target areas defined as circles of a specified diameter around central points.

Output Medium

Semi-custom data profiles can be produced on paper output and magnetic tape.

The desired output medium will be specified by each client on ordering the product.

Price

The prices of semi-custom profiles are dependent on the total population being counted and the number of geographic areas for which data are presented. The prices for profiles of 100% data range from \$1,500 for a small number of geographic areas in an area of less than 500,000 to \$3,300 for up to 199 geographic areas covering all of Canada. Prices for profiles of 20% sample data range from \$3,000 to \$6,600.

Delivery

Semi-custom profiles presenting the basic data collected for 100% of the population are now available; profiles presenting detailed socio-economic data collected from a 20% sample will be available at the same time as the published version. (See List of Publications, page 36.) Further details on the semi-custom data profiles may be obtained through the Advisory Services at the nearest Statistics Canada Regional Reference Centre or from the Census Custom Products Service in Ottawa. Users are encouraged to order the products well in advance of the release dates, particularly if specialized geographic areas must be created.

CUSTOM PRODUCTS

Within the constraints imposed by the protection of confidentiality, custom products can be produced from the 1971, 1976, 1981 and 1986 Census micro-data bases. Products are developed to meet the needs of individual clients, according to their exact requirements in terms of content, geography, format and output medium.

Statistics Canada consultants assist clients in developing specifications for custom products which meet as far as possible the data requirements, while keeping within budget and other constraints.

Content

A custom product may be any tabulation of census micro-data not available through other products or services. Examples of specialized content needs include:

- a new combination or cross-classification of variables;
- the presentation of a different distribution for an existing variable;
- the creation of a new variable derived from existing ones.

Census Dictionaries of terms are available for each of the census micro-data bases to assist clients in identifying the required variables and distributions. Documentation on historical comparability of concepts is also available for users interested in making comparisons across census years.

Geographic Level

As for the semi-custom products, custom products can be produced, within the limits imposed by the protection of confidentiality, for any geographic area which can be marked on a map. The geographic level may be defined in terms of any of the following types of areas:

- Standard census geographic areas

Standard census areas include both political and statistical regions, such as:

- provinces and territories;
- census metropolitan areas (CMAs) and census agglomerations (CAs);
- primary census metropolitan areas (PCMs) and primary census agglomerations (PCAs);
- census divisions (CDs);
- census subdivisions (CSDs);
- census consolidated subdivisions (CCSs);
- federal electoral districts (FEDs);
- census tracts (CTs);
- provincial census tracts (PCTs);
- urban areas (UAs);
- enumeration areas (EAs).

Geographic Level - Concluded

Standard census areas can be added or subtracted to form special user-defined regions. For example, census tracts could be aggregated to form city planning districts, or census subdivisions aggregated to form market areas.

- Geocoded regions

Data can be retrieved for any area which can be marked on a map and geocoded. Possible formats include circles around points, grids, or other simple polygons. Examples of applications of geocoding include city wards which are defined as polygons on a map, and marketing target areas defined as circles of a specified diameter around central points.

Output Medium

Custom products can be prepared to the specifications of the client on a variety of output media, including:

- computer print-out;
- magnetic tape; and
- microfiche.

Specialized formats, required for compatibility with computer systems or publication programs, can be provided in most cases.

Price

Custom products are prepared on a cost-recovery basis, including all personnel, computer and other costs incurred in developing and producing the tabulation. Factors influencing the cost and delivery time include the number of data cells in the table and its complexity, the size and number of geographic areas to be presented, and the output medium.

Delivery

The cost and delivery time is determined individually for each custom product, and approved by the client before development begins.

Further details on custom products are available from the Census Custom Products Service in Ottawa or the nearest Statistics Canada Regional Reference Centre.

GEOGRAPHY INFORMATION SERVICES

The Geography Division of Statistics Canada offers a variety of services. These services give the client flexibility in selecting their geographic base. Special requirements can be discussed with knowledgeable personnel in the division.

Geocoding

The Geographically Referenced Data Storage and Retrieval System (GRDSR), or Geocoding System, is used to geographically code and store census data. It assigns geographic coordinates (centroids) at the population centres of every enumeration area in Canada and at the geographic centre of each block-face in most large urban areas. This system permits the retrieval of census data for user-defined areas.

Special Population Compilations

Population compilations are available from the current census and previous censuses. Counts are based on compilations from census collection documents.

Special Analysis/User Consultation and Systems Development

We develop products and systems to meet special needs and offer advice on making better use of available products and services.

Map Library

The Geography Division's Map Library contains all maps used by census collection personnel (Commissioners, Census Representatives) from the 1971 Census onward, and has the capacity of reproducing these maps at the same size or as enlargements or reductions.

Customized Street Index File

A cross-referenced street index file of address ranges by user-specified areas can be produced from the Area Master File.

Node Maps/AMF Street Network

These maps, available for existing AMF coverage, show the street pattern in detail, including names, as well as other features such as railroad tracks, rivers, municipal boundaries and all nodes (where streets and other features intersect).

For further information on these services and products, please contact the nearest
Statistics Canada Regional Reference Centre or
Geography Information Services
Statistics Canada
Jean-Talon Building, 3rd Floor

(613) 951-3889

GEOCARTOGRAPHICS SERVICES

The Geocartographics Services involve the application of computerized techniques to geography, cartography and graphics. A wide range of clients, both inside and outside the federal government, are serviced on a cost-recovery basis. The services offered include customized maps, atlases, machine-readable files and consultation. Prices are based on specific client requirements.

Customized Maps and Atlases

Customized maps and atlases for national, regional, provincial and urban areas can be produced on paper, mylar, film, transparency or slide for standard census areas, postal codes or client-supplied areas. A sample is shown in Appendix C.

Customized Cartographic Files

A range of files for standard and non-standard census geographic areas are available in user-specified coordinate systems and formats suitable for use with various mapping systems (including SAS/GRAPH, ATLAS, GIMMS, STATMAP and ARC/INFO). Included are census subdivisions, census consolidated subdivisions, census divisions, provinces, federal electoral districts, census tracts and forward sortation areas. Data are available on tape or diskette.

Cartographic Consultation and Training

Consultation and training are offered concerning automated mapping packages, geographic information systems, geographic data bases, and micro-based statistical mapping. Standard courses are available on geographic information systems, census cartography, the GIMMS mapping package, and the TELL-A-GRAF graphics package.

For further information on these services, please contact the nearest Statistics Canada Regional Reference Centre or

OTHER CENSUS-RELATED SERVICES

Users can obtain assistance from Statistics Canada services other than the Census Custom Products Service, Geography Information Services, Geocartographics Sub-Division and Electronic Data Dissemination Division, which were mentioned on previous pages. An explanation of the products and services provided by these other services follows.

CENSUS OF AGRICULTURE

The User Services Unit of the Census of Agriculture provides data users with special tabulations that cannot be met from regular publications or special tabulation packages available from the Statistics Canada Regional Offices. Users should contact the User Services Unit if they require cross-classified data, have non-standard geographic area requests, or require new distributions for displaying sums and counts. Custom requests can be filled for each of the 1971, 1976, 1981 and 1986 Censuses. Historically linked data go back to the 1966 Census. The User Services Unit also serves needs for socio-economic data concerning the farmer and his/her family from the 1971, 1981 and 1986 Agriculture-Population Linkages.

Users are cautioned that confidentiality constraints are imposed on the data prior to release. All user-specified requests are cost recoverable. Cost estimates and completion dates are supplied to the user before work commences.

HEALTH AND ACTIVITY LIMITATION SURVEY

The Health and Activity Limitation Survey (HALS) is a follow-up survey to the 1986 Census of Population. It includes a sample of approximately 120,000 individuals who completed the detailed questionnaire in the 1986 Census of Population. The survey provides, in addition to the data from the census, information on the nature and severity of the disabilities, and the barriers encountered by disabled persons.

Data from the survey will be released in March 1988. The proposed output includes a number of publications and a micro-data file. The HALS program team will respond to special requests during 1988.

For further information concerning products to be available from the HALS, please contact:

INDEX

INDEX

This index is alphabetized following the letter-by-letter principle. The abbreviations are listed first and the abbreviation "St." is treated as "Saint". To differentiate between the province of Quebec and the city of Québec, the first one is always spelled without an accent.

The titles of publications are emphasized by bold characters.

ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems - CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information.

The 1986 Census Data Base

*La base
de données
du recensement
de 1986*

Electronic Census "Profiles"

If you find the demographic, cultural, and economic view of Canada's urban centres you get in the Census Tract Profiles publications series useful, you'll appreciate the flexibility of having it in electronic form.

That's why Statistics Canada's Electronic Data Dissemination Division is producing the Profiles series on tape and diskette.

From St. John's to Victoria, Census Tract Profiles are available for 37 large urban areas at both the census tract and component municipalities levels. Further, such profiles are also available for all Census Divisions and Census Subdivisions in the country. And you can easily analyze them in your own computing environment.

1986 Census Tract data are more complete than ever before, with more detailed data on mother tongue and the 65-plus age group, and an additional census-tracked centre - Lethbridge, Alberta.

Any way you want them, the stats on Canada's urban centres are waiting for you at Statistics Canada. Please call your nearest regional reference centre for details.

Les «Profils» du recensement sur support électronique

Si vous trouvez utiles les aperçus démographiques, culturels et économiques des centres urbains du Canada que vous présente la série de publications «Profils - Secteurs de recensement», vous apprécierez d'autant plus la possibilité de les obtenir sur support électronique.

C'est pourquoi la Division de la diffusion informatique des données de Statistique Canada stocke actuellement cette série sur bandes et sur disquettes.

Vous pouvez ainsi obtenir des profils portant sur 37 grands centres urbains, de St. John's à Victoria; ceux-ci présentent de l'information au niveau des secteurs de recensement et des municipalités les composant. Vous pouvez aussi vous procurer des profils des divisions et subdivisions de recensement. Il ne vous restera plus ensuite qu'à les analyser avec votre propre système informatique.

Vous vous apercevrez également que les données des secteurs de recensement de 1986 sont plus complètes que jamais. Entre autres, il y a davantage de données détaillées sur la langue maternelle et sur les personnes âgées de 65 ans et plus ainsi que des profils des secteurs de recensement de Lethbridge (Alberta).

Quelle que soit la forme sous laquelle vous les désirez, les données portant sur les centres urbains du Canada n'attendent que vous. Pour en savoir plus long, il vous suffit de communiquer avec le centre de consultation de Statistique Canada de votre région.
